

Description of the set-up and instrumentation used for our tests on air amplifiers.

The **AM-T Series** air amplifiers offer excellent performance for both suction and blow-off. The quality of design and construction optimises the Coanda effect, so they use a small amount of compressed air to generate a powerful, high-speed flow. Their capability to perform both functions of suction and blow-off make them useful for many applications, including ventilating electric cabinets, conveying fumes and lightweight particles produced by machining, conveying and handling of light parts, drying, and cooling. When combined with the VR Series coolers, they create an effective patented system where, by conveying the hot air flow exhausted by the cooler to actuate an AM Series amplifier, the cooling power is optimised, so that to make it possible to drawn hot air out of enclosures and ventilate closed areas to be cooled. The flow-rate can be adjusted by simply turning the nut.

- Design geometries optimised to maximise the Coanda effect
- Adjustable flow-rate
- Wide section for suction and blow-off, suitable for a variety of applications
- Instant operation
- No moving part, so not subject to wear and tear
- No electricity or chemical substances required
- More efficient than venturis and ejectors
- It does not cause neither sparks nor interferences
- Reliable and maintenance-free

SERIES AM-10T
AIR AMPLIFIERS

GENERAL FEATURES - AM-10T	
Materials	Aluminium
Air inlet port	G-1/8" F
Inlet diameter	Ø 19
Outlet diameter	Ø 19
Air supply pressure	max 7 bar
Recommended hose	Ø 6x1 - Ø 8x1
Weight	95 g

PERFORMANCES AND CONSUMPTION TABLE

OPENING 90°

SERIES AM-20T
AIR AMPLIFIERS

SERIES AM-25T
AIR AMPLIFIERS

GENERAL FEATURES - AM-20T	
Materials	Aluminium
Air inlet port	G-1/4" F
Inlet diameter	Ø 32
Outlet diameter	Ø 32
Air supply pressure	max 7 bar
Recommended hose	Ø 8x1 - Ø 10x1
Weight	240 g

GENERAL FEATURES - AM-25T	
Materials	Aluminium
Air inlet port	G-1/4"
Inlet diameter	Ø 32
Outlet diameter	Ø 32
Air supply pressure	max 7 bar
Recommended hose	Ø 10x1 - Ø 12x1
Weight	280 g

AC44	AM-50T	63

SPECIAL APPLICATIONS

AIR-SPEED 25 • SUCTION GUN

GENERAL FEATURES - AIR-SPEED 25

Materials	Aluminium
Supply connection	Ø 8 x 1
Inlet diameter	Ø 32
Outlet diameter	Ø 32
Air supply pressure	max 7 bar

On request, available in version for blowing.

SPECIAL APPLICATIONS

AIRCLEAN 30

FUNCTIONING PRINCIPLE
By opening the rear ball valve, the compressed air activates the **AM-30T** amplifier (recommended pressure: 3 - 5 bar), whose amplified and powerful flow gets out from the tapered outlet. The handle has length 1 m.

- BENEFITS**
- Manageability and robustness, as it is made of aluminium.
 - Reduction of consumption, thanks to the air amplifier.
 - High power of the air flow.

FIELDS OF USE

- Cleaning of large conveyor belts (waste sector, mining sector, etc.);
- Cleaning of hoppers in the construction industry, etc.;
- Cleaning of large components in the aeronautic, rail, and marine sectors;
- Cleaning of silos, metallic carpentry, etc.
