

Sliding Door Damper (SDD)

In 2015, HAHN Gasfedern presented a new product group for a smooth dampening and closing of sliding doors and other applications involving linear moved masses of 40–400 kg.

- The Sliding Door Gas Spring is our inexpensive entry-level product. Complementing the SD product family, the SDG provides a safe braking and prevents the braked masses from swinging back. The SDD is HAHN’s advanced product for a safe, gentle and targeted braking and closing of sliding doors. With its Sliding Door Damper, HAHN Gasfedern is launching a real door-damper innovation into the market.

The Sliding Door Damper is a spring-damper element that combines the functions of two gas springs and one oil damper. Three functions are thus combined:

- cushioned docking
- degressive braking
- gentle closing

By the assist of additional assembly slots at the end of the housing, the installation becomes very easy and flexible.

Type	Weight Range	Assembly Dimension
SDD 04-12	40-120 kg	a= 287 / b= 319 / c= 14,5 / d= 24,6 mm
SDD 06-15	100-200 kg	a= 287 / b= 319 / c= 14,5 / d= 24,6 mm
SDD 06-19	200-400 kg	a= 423 / b= 463 / c= 24 / d= 32,1 mm
SDG 04-12	20-80 kg	a= 287 / b= 319 / c= 14,5 / d= 24,6 mm
SDG 04-12 VA	40-80 kg	a= 287 / b= 319 / c= 14,5 / d= 24,6 mm
SDD 08-23	> 400kg	on request
